OVERZICHT ZETMEELAARDAPPELRASSEN voor teeltseizoen 2006

Bij de samenstelling van deze tabel is gebruik gemaakt van resultaten van meerjarige proeven van de proeflocaties t Kompas en Kooijenburg van Praktijkonderzoek Plant & Omgeving B.V., het HLB en de Plantenziektenkundige Dienst.

Verder zijn gegevens gebruikt van de Rassenlijst, de rassenbulletins en de kwekers.

Resultaten van een beperkt aantal jaren onderzoek zijn cursief gedrukt.

| | |
|-----------------------------|--|
| AM-resistentie | HR = meer dan 80% reductie R = 35-80% reductie LV = 35% reductie - 300% toename V = meer dan 300% toename |
| wratziekte (fysio 2/6) | 2 = zeer vatbaar 10 = resistent |
| phytophthora (loof en knol) | 2 = zeer gevoelig 9 = weinig gevoelig |
| roodrot | 2 = zeer gevoelig 9 = weinig gevoelig |
| (poeder)schurft | 2 = zeer gevoelig 9 = weinig gevoelig |
| vroegrijpheid | 2 = laat 9 = vroeg |
| loofontwikkeling | 2 = weinig loof 9 = veel loof |
| knolvorm | r = rond ro = rondovaal l = langovaal o = ovaal |
| aantal knollen | 2 = weinig knollen 9 = veel knollen |
| stootblauw | 2 = erg blauwgevoelig 9 = weinig blauwgevoelig |
| rooibeschatting | 2 = erg gevoelig 9 = weinig gevoelig |
| kiemlustigheid | 2 = erg kiemlustig 9 = weinig kiemlustig |
| bewaarbaarheid | 2 = slecht bewaarbaar 9 = goed bewaarbaar |
| vatbaarheid virussen | 2 = zeer vatbaar 9 = weinig vatbaar |
| kringerigheid | 2 = zeer vatbaar 9 = weinig vatbaar |
